

WANTED: MINING ENGINEER CONSULTANT

 VBKOM Mining Consultants Canada Ltd

 Full-time, Permanent

 Sudbury, Ontario, Canada

 As soon as possible

 Preference will be given to Canadian citizens

About VBKOM Canada

VBKOM is a 17-year-old global mining consultancy with extensive experience across diverse projects, commodities, operations, and clients. Through our offices in Toronto and Sudbury, we're expanding our North American presence, offering specialized open-pit mining services and unparalleled expertise in ultra-deep underground mining. Our company culture is a unique blend of playful and professional, and we're always on the lookout for "astronauts" – top-performing, uniquely skilled, and highly motivated individuals – to join our team.

Duties & Responsibilities

- › Performing technical mining engineering tasks and outputs on an expert level
- › Periodic travel to client sites to perform project work
- › Block model manipulation
- › Strategic mine design, scheduling, and reporting
- › Mining-related inputs for financial modeling
- › Pit/stope optimization
- › Building service offering toolkits and competency
- › Equipment studies
- › Lead and own projects + multiple project involvement
- › Operating cost models
- › Technical Report and CPR compilation
- › Trade-off studies / Options analysis
- › Cut-off grade analysis
- › Business development – client engagement and sales

Desired Qualification & Experience

- › Mining Engineering degree
- › >6 years but <10 years
- › Mandatory: relevant operations mining (>2 years) and mine planning/consulting experience (>2 years)
- › Beneficial: having both Open Pit and Underground experience
- › Professional registration preferable (for CPR Reserve sign-off)

Desired Skills

Mining Skills:

- › Short-, medium-, and long-term mine planning
- › Understanding of various mining methods
- › Knowledge of the entire mining value chain for 3 to 5 commodities
- › Compliance code exposure
- › Understanding the context of project documentation (Concept, PFS, FS, DD, CPR, MWP)
- › To fully utilize available mining engineering specialist software packages (i.e. Deswik (preferable), GEOVIA Surpac, GEOVIA MineSched)
- › To provide solid technical inputs to every project/problem/situation that might arise under the project framework

General Skills:

- › Good consulting understanding and aptitude
- › Efficient and effective delivery
- › Able to engage with clients and work independently
- › Building client relationships and sales
- › Grow business footprint
- › Plan, do, coordinate, and manage self and operate without supervision (ensure own quality)
- › Project management
- › Project reporting and presentation
- › Professional client engagement and presentation
- › To work effectively as part of a team
- › Technical report writing
- › Provide technical inputs to proposals
- › Training, developing, and mentoring team members
- › To continuously stay up-to-date with new technical/mining engineering developments and take accountability for personal development

Package & Remuneration

Market-related with benefits negotiable: CAD100,000.00–130,000.00 per year.

Should you wish to apply, please email your CV to hr@vbkom.ca using “Mining Engineer Consultant Vacancy” as the subject line.
